

Ration Messaging and Collaboration

Message and Collaborate Seamlessly

Ration is a messaging and collaboration platform that enables seamless communication for teams in organisations of all sizes. It is designed with an intuitive interface that encompasses a flexible and extensible set of features for modern business communications. Apart from the standard protocols support for email messaging, calendaring and address books, other modules in Ration can be integrated into any business application through RESTful APIs. At a low cost, businesses can securely and reliably collaborate on the platform to any scale.

Providing the whole gamut for business collaboration, core modules within Ration include Email, Instant Messaging, Calendar, Address Book, Task Management and Web Conferencing. Further development plans include integrating Document and File management and Office Document processing applications. The platform may be deployed within your infrastructure to enhance your compliance requirements, or subscribed to within our SaaS environment.

- * **Extensible** – Easy to adapt and include any business collaboration application
- * **Low Cost** - Without sacrificing a need or performance, adoption cost and TCO are low
- * **Standard Based** – Full Support for IMAP, SMTP, CalDav, CardDav, WebRTC, REST API
- * **Flexible** – Customise the modules or User Interface to adapt to the brand requirements.
- * **Security** – Embrace full email security, data encryption or manage your data (on-premise edition) for compliance

Ration MCS

Designed to optimise business messaging and collaboration via a suite of applications. Each application within the suite is built as a best-of-breed module that is robust and highly scalable.
